Public Service Announcement

Please Keep Carts Accessible for Waste Collectors

Due to a great number of residents at home self isolating during the current pandemic, our waste collectors that pick up our garbage, recycling and yard waste are having to navigate around additional vehicles not typically parked in their path. These obstructions to waste collection carts are impeding the drivers ability to access carts and turn around in crowded cul de sacs adding additional time to collection routes.

In order to avoid unnecessary delays to your waste collection service, residents are asked to please do your part and ensure your vehicles are not obstructing your waste carts or the trucks so they can continue to provide service as efficiently as possible. In addition, make sure your garbage, recycling, and yard waste carts are not obstructed by vehicles, or any other obstruction in order to streamline service.

Thank you for your cooperation.
